BHW is a digital product design and development company headquartered in Austin, Texas. Over our 16 year history, we have designed and developed over 360 mobile and web apps. We've been selected as a South by Southwest Interactive Innovation Award finalist and for the last five years, selected as one of the best places to work in Austin. We work with large corporations, state organizations, small/medium-sized businesses and startups. We deliver highly polished and technically advanced solutions.

WHAT'S IT LIKE HERE?

BHW maintains a casual environment, provides fantastic benefits, and places a major emphasis on work/life balance. To that end, no team members are required to work more than 40 hours a week and any voluntary overtime is paid.

At BHW, projects typically last between 3 and 6 months and the majority of our time is spent working on new applications, rather than maintaining legacy systems. This means we are free to use new languages, frameworks, technologies, and approaches when solving new problems. At BHW, we ensure that your skills always stay current.

Other BHW perks include: paid lunches, frequent company events, Fridays off in December, motorized standing desks, great gear, BHW game nights, hands-on training, mentorship, and allowing all developers to contribute real code to real projects.

WHAT ARE WE LOOKING FOR?

We are looking for Computer Sciences students who are seeking full-time, intern, and co-op opportunities.

If you love always having a new challenge, want to be at the forefront of mobile and web development, and are someone who has a drive to create fantastic software, you would be a perfect fit to join our growing team!
